

I agree that with Governor Codey, I think that the do not call program is working, however a few stubborn companies are continuing their business as usual ignoring this fact. I am one of the citizens that have signed-up on this program due to the amount of unsolicited calls I used to receive once I was home. I was receiving an average of 7 to 8 phone calls per night from mortgage companies that already had some of my private information very handy. Now, I have one or two and it happens on Sunday nights. I have caller ID, my telephone number is not listed, therefore I do not want just anybody contacting me trying to sell or offering something I am not interested in. Please continue to back-up this program. Do not let these companies invade my right to privacy. Thank you.
